

brochure 2026

Formula Student

A wide-angle photograph of a Formula Student event at sunset. In the foreground, a large group of students, many wearing team uniforms, are posing on a racetrack. Behind them, numerous open-wheel formula cars are lined up. The background features a large crowd of spectators, several white tents, and various banners under a warm, orange-hued sky.

Formula Student is the ultimate global engineering project where students design, build, and race a formula car. It functions as a simulated automotive business, demanding high technical skill, budget management, and a compelling business case. This process creates industry-ready, top-tier talent—making our team a strategic recruitment and innovation partner for your company.

UPT Racing Team

UPT Racing Team is a student organization from Politehnica University of Timișoara that designs and builds Formula Student race cars.

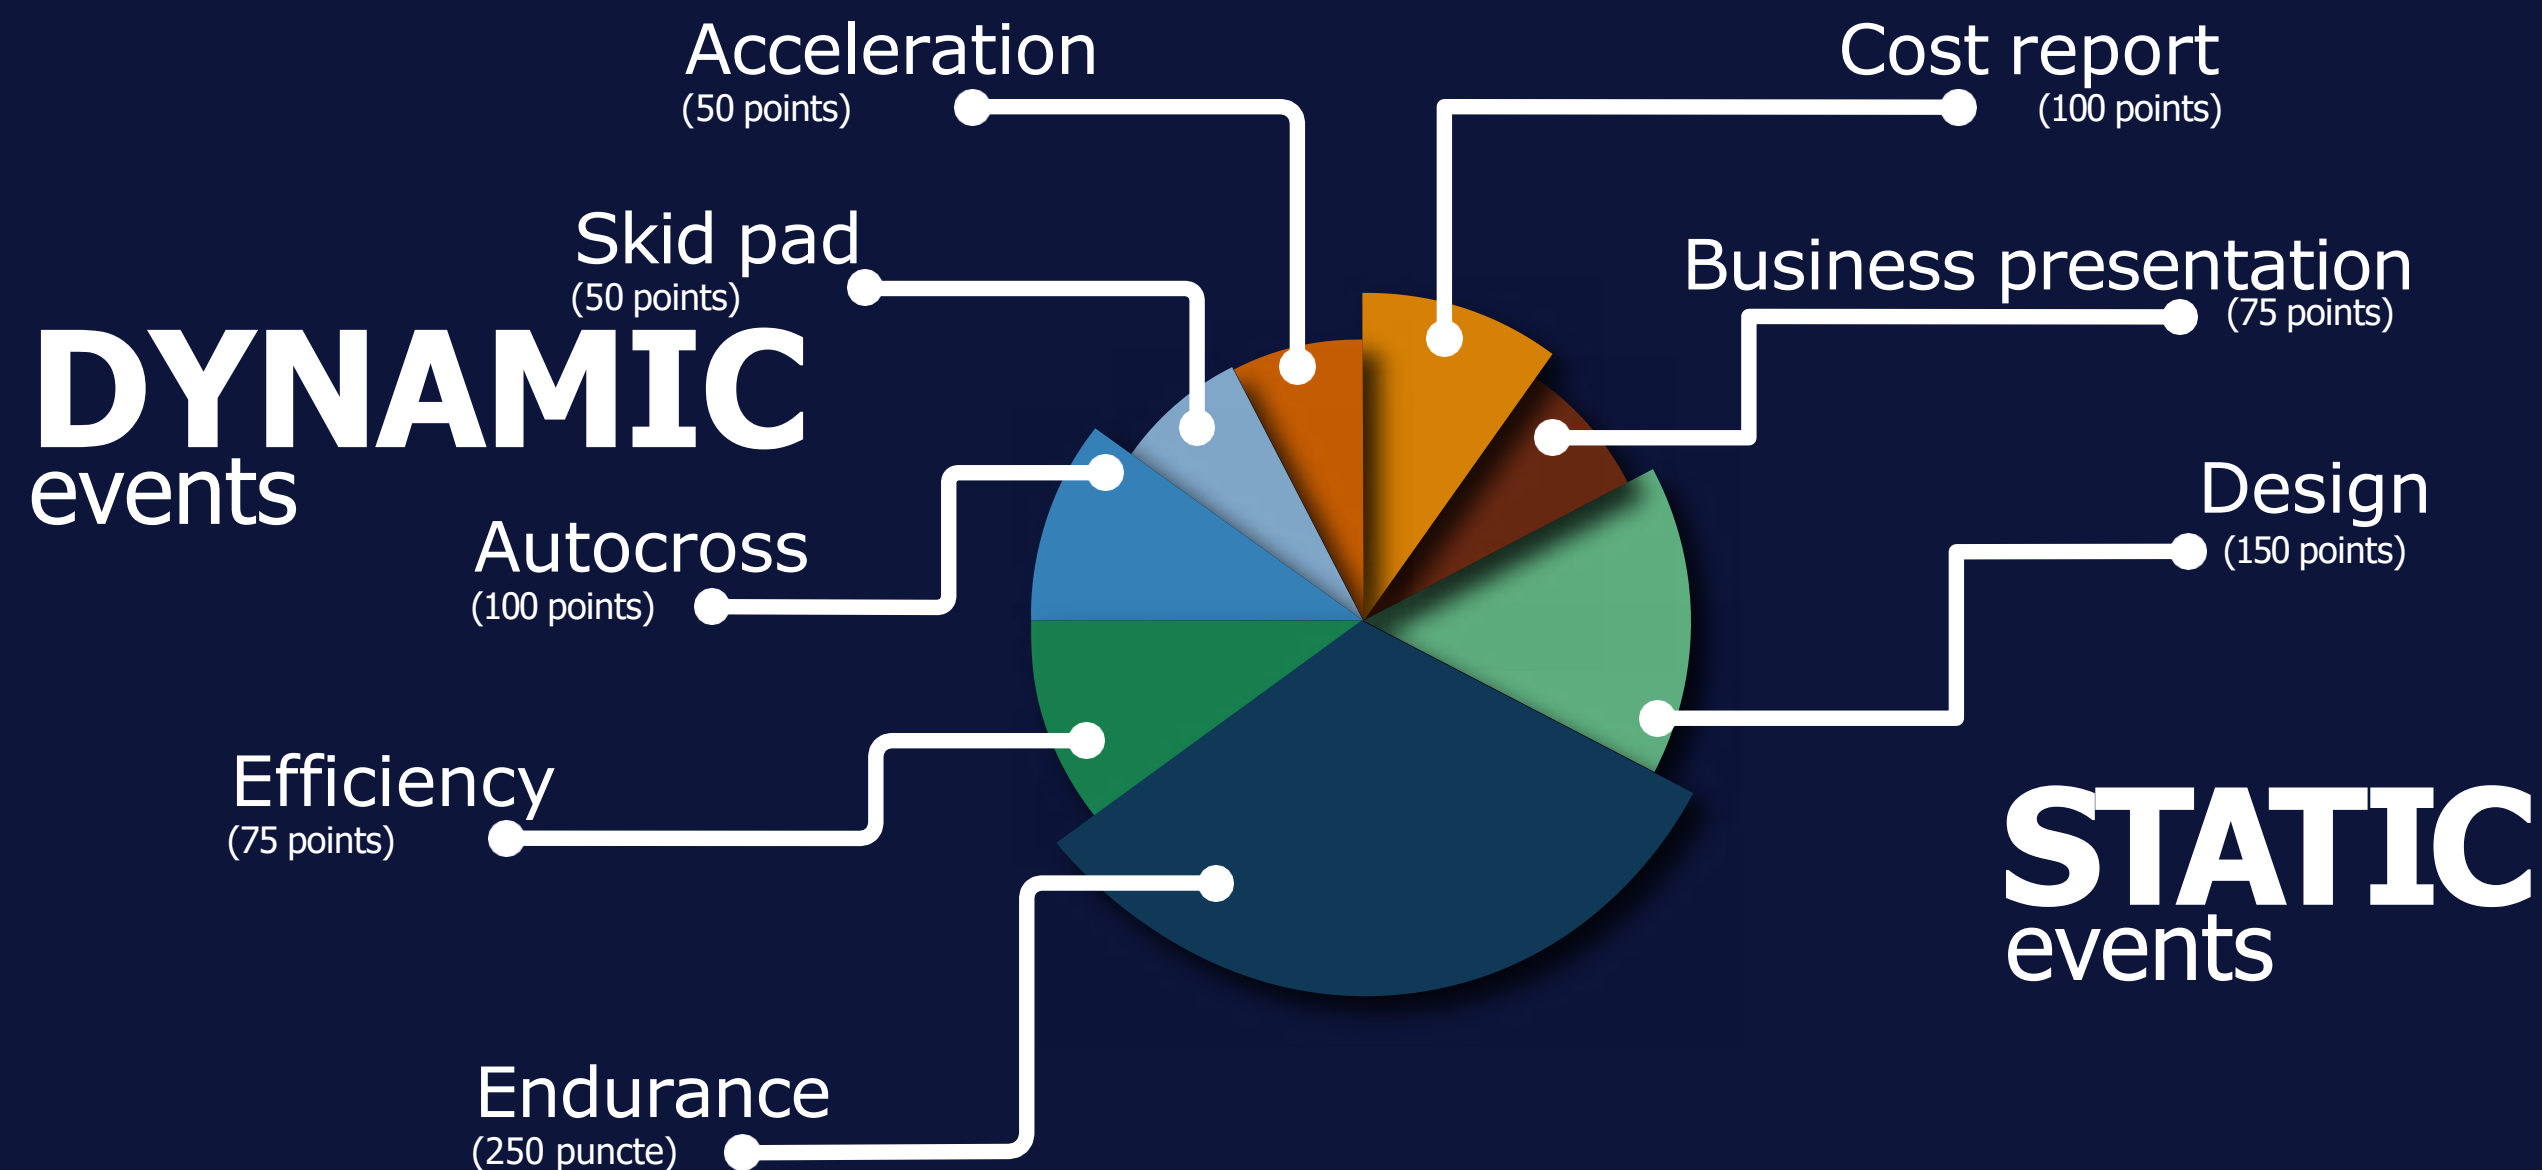

The team unites students from various fields to apply their technical and creative skills in engineering, marketing, and management, promoting innovation, teamwork, and excellence in motorsport.

It also prepares future engineers who will enter the job market with valuable practical experience gained through hands-on work on Formula Student vehicles.

Competitions

Static Events: Validate the team's engineering processes and technical knowledge through presentations of design documentation, cost analysis, and business plans to expert judges.

Dynamic Events: Challenge the actual performance of the car after technical inspections, by competing in motorsport-style trials (acceleration, endurance, etc.) against other teams.

Dimensions: 2895(L) x 1395(I) x 1383(H)[mm]
Track width: 1221(F) / 1226(S)[mm]
Wheelbase: 1660[mm]

Weight: 380 [kg]
Engine: Honda CBR600 F4
ECU: Megasquirt V2

TSR1

2013-2017

Dimensions: 3155(L) x 1425(I) x 1177(H)[mm]
Track width: 1200(F) / 1000(S)[mm]
Wheelbase: 1525[mm]

Weight: 250[kg]
Engine: Honda CBR600 F4i
ECU: Megasquirt V3

TSR2

2017-2022

Dimensions: 2980(L) x 1323(I) x 1170(H)[mm]
Track width: 1100(F) / 1087(S)[mm]
Wheelbase: 1525[mm]

Weight: 280 [kg]
Engine: Yamaha MT-07
ECU: Haltech Elite 1500

TSR3

2022-2023

Dimensions: 3090(L) x 1323(I) x 1170(H)[mm]
Track width: 1183(F) / 1114(S)[mm]
Wheelbase: 1550[mm]

Weight: 273,5 [kg]
Engine: Yamaha MT-07
ECU: Haltech Elite 1500

TSR3 EVO

2023-2024

Dimensions: 2924(L) x 1351(I) x 1170(H)[mm]
Track width: 1157(F) / 1121(S)[mm]
Wheelbase: 1525[mm]

Weight: 256 [kg]
Engine: Yamaha R6
ECU: Haltech Nexus S2

TSR4

2024-2025

Competitional Calendar

TSR1:

- Formula SAE Italy 2016
- Formula SAE Italy 2017
- Formula Student Hungary 2017

TSR2:

- FS Netherlands 2017 & 2018
- FSAE Italy 2017 & 2018 & 2019

TSR3:

- FS East (Hungary) 2023
- FS Czech 2023
- FS Balkans 2023

TSR3 evo:

- FS Balkans 2024
- FS Czech 2024
- FS Alpe Adria 2024

TSR4:

- FS Balkans 2025
- FS Alpe Adria 2025

This year we will participate in 4 competitions, with *TSR4 Hybrid*:

- FS Balkans (~22 *teams*)
- FS East(Hungary)(92 *teams*)
- FS Czech (~75 *teams*)
- Formula SAE Italy(~60 *teams*)

Why should you partner with us

Support the creative engineers of tomorrow

Our team members are passionate about engineering and you can improve their technical knowledge.

This project gives the opportunity for students to be creative without boundaries and to learn through hands-on activities.

Connection with dedicated students

The Politehnica University of Timișoara is one of the most prestigious technical universities in Romania, widely recognised all over Europe.

Our partnership will ensure a strong and direct connection with both graduates and undergraduates with the prospect of securing an efficient network of employers and eventual employees, interns and researchers.

Brand recognition

Being a social interesting project, a lot of students are engaging with UPT Racing Team.

This means that your image, displayed on our car, uniforms, promotional materials and social media will reach a tremendously vast local and international community of students.

What's next?

For the 2026 season, we want to use all the knowledge collected in past seasons to accomplish ***a podium finishing car***.

In the last season we've managed to develop and validate a ***hybrid architecture***.

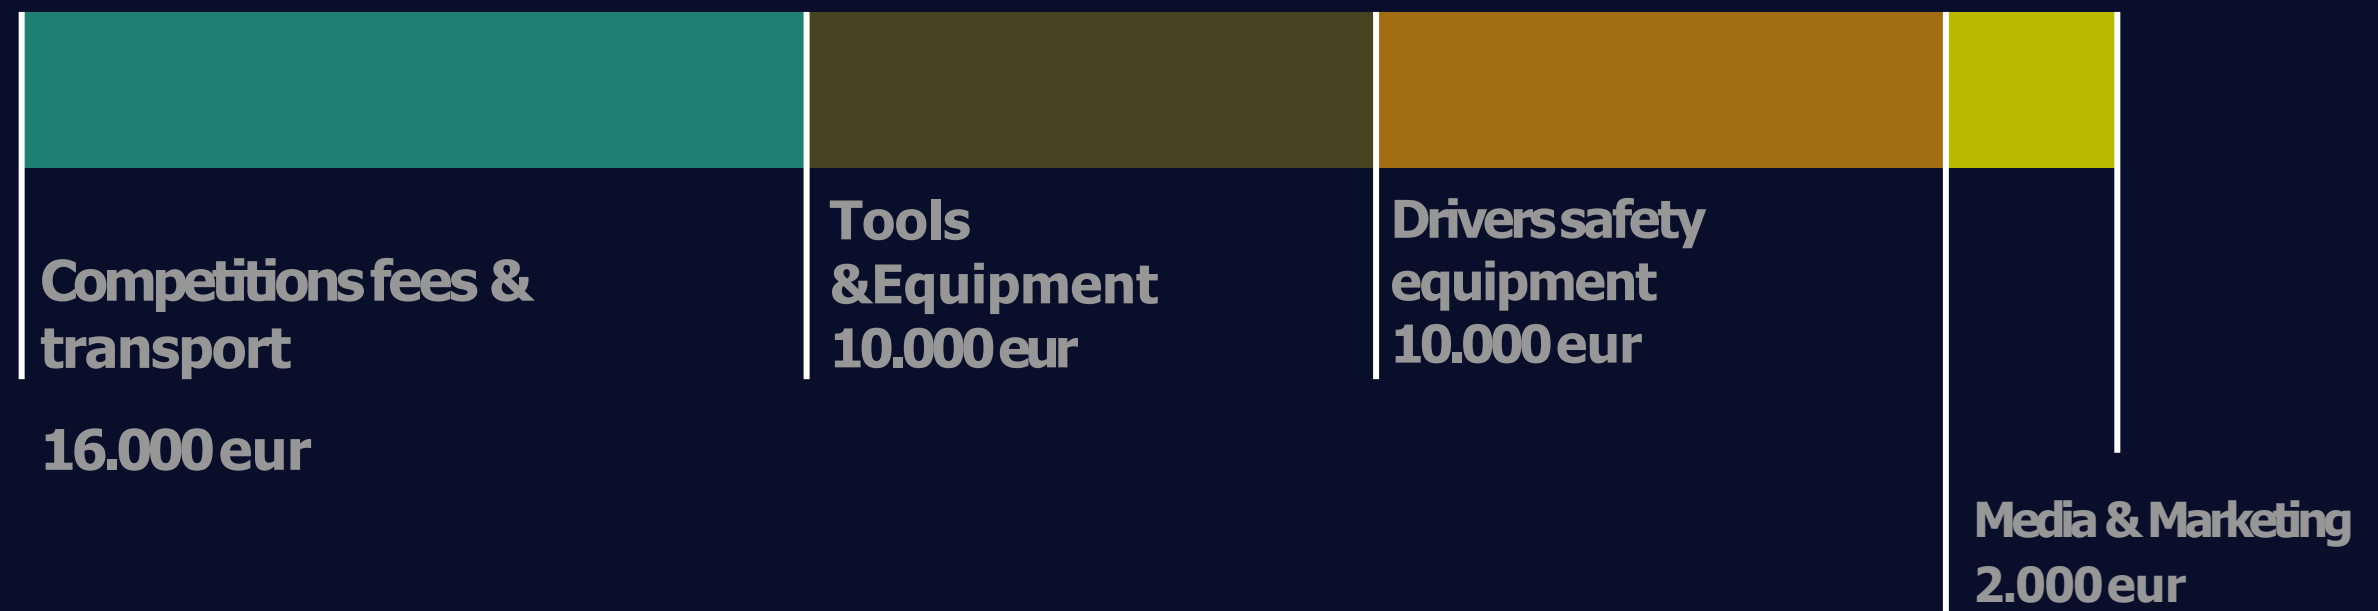

TSR4 **HYBRID**

Costs

The Car
42.000 euro

Other expenses
38.000 euro

Total cost: 80.000 euro
